

Deer Harbor Estuary Habitat Restoration Project Orcas Island, Washington

Appendices to Environmental Assessment and Feasibility Study Report

**Prepared by:
Deer Harbor Restoration Project Team
Pursuant to IAC/ SRFB Grant No. 02-1577N
October 2005**

Table of Appendices

Appendix A: Profiles of Selected Local Water Well Logs

Appendix B: Estuary Cross Sections and Sediment Monitoring Locations

Appendix C: Sediment Core Data

Appendix D: Hydrologic and Hydraulic Analysis

Appendix E: Deer Harbor Eelgrass Assessment

Appendix F: Deer Harbor Fish Utilization Study

Appendix G: Fish Trap Creek Salmon Habitat Evaluation

Appendix H: Threatened, Endangered, and Other Species of Concern List

Appendix I: Assessment of Potential Sources of Toxic Substances

Appendix J: Planning Level Cost Estimates for Restoration Measures

Appendix K: Preliminary Assessment of Plant Species and Communities

Appendix L: Conceptual Designs of Bridge Alternatives

Appendix M: Color Images of Bridge Alternatives

Well Logs in SW 1/4 Sec. 6: Comorant Bay Road South to Lagoon

Well Logs in NW 1/4 Sec. 7: Cross Section West to East near Mouth of Lagoon

Legend

- # = Identifying well log no.
- Cl = Clays (tan, blue)
- Sh = Shales (green, black)
- Q = Quartz inclusions
- L = Limestone
- B = Basalt
- "R" = unspecified rock
- = ground surface and static water level

Note: rock types and elevations are as reported in drilling logs

Geologic strata and elevations were summarized from drilling logs available on the Wash. Dept. of Ecology website. SJCCD does not warrant the accuracy of the data. Locations of wells are approximate and are intended for illustration purposes only.

Profiles of Local Water Well Logs
